

national priorities for **economic development**, **technological advancement**, and **economic resilience** as outlined by the U.S. government. This endeavor fulfills the criteria for national importance and will contribute substantially to the long-term prosperity of the U.S. economy.

My work will contribute to the ongoing progress of my field by fostering a data-driven culture within organizations, improving both decision-making efficiency and accuracy. By empowering U.S. companies and their workforce with critical digital skills and advancing technological innovation, I aim to enhance their competitiveness in both domestic and global markets.

To conclude, I am unreservedly confident that I possess and will effectively apply the necessary skills to successfully carry out the described endeavor in many years to come, if granted a favorable decision to my EB-2 NIW petition.

Sincerely,
