

business applications with advanced analytics/AI/ML, responsible for supporting cloud infrastructure, Oscar *improved the model's deployment by creating in-house solutions, reducing the deployment by 60%.*

I believe Oscar's proposed endeavor to develop and implement comprehensive training programs and optimization strategies for process improvement and data-driven decision-making, by integrating affordable technologies powered by artificial intelligence (AI) and robotic process automation (RPA). will contribute to small and medium-sized enterprises (SMEs) in maximizing their operational efficiency and growth potential, saving time and resources, enhancing competitiveness, and offering to employees valuable upskilling opportunities in high-demand tools. His previous successes in the same field as his proposed endeavor as outlined above, demonstrate his capabilities in being successful in the US and his endeavor.

Oscar is a highly qualified Process Automation (RPA) and Artificial Intelligence (AI) professional whose work ethic, and commitment to continuous improvement will serve the US economic competitiveness. For these reasons, I fully support this petition. And I hope the US will view Oscar as the great talent that he is.

Sincerely,
